

MUHAMMAD HASSAN QURESHI

SOFTWARE ENGINEER

KRL Road., Rawalpindi | muhammadhassanqureshi987@gmail.com | +92-333-9411309

I'm a Software Engineer with practical experience in FinTech, open banking, and ERP systems. I've worked with ASP.NET Core, and optimized databases using Dapper and SQL procedures. I focus on building secure, reliable, and scalable systems that solve real business problems. I enjoy working with teams, keeping my code clean, and turning complex ideas into smooth, working solutions.

AREA OF EXPERTISE

FinTech

Wallet Banking (Backend)

ERP

ASP.Net Core

KEY ACHIEVEMENTS

- **Optimized FinTech Integrations:** Successfully delivered multiple Raast, 1LINK, and QR-based payment modules across different banking platforms, improving transaction reliability and user satisfaction.
- **System Scalability & Innovation:** Played a key role in upgrading legacy platforms like Aik Digital 1.0 to 2.0, ensuring seamless migration, enhanced performance, and secure user data transition.

PROFESSIONAL EXPERIENCE

APP IN SNAP

April 2025 - Present

Aik Digital (Bank Islami)

- Worked on Raast integration for payments, bill payments, P2P transfers, merchant QR, and till-code payments to ensure smooth and secure transactions.
- Developed and improved merchant onboarding and QR management systems, making payment setup and tracking easier for businesses.
- Managed migration from Aik Digital 1.0 to 2.0, ensuring safe and reliable user data transfer to the new platform.
- Worked on Raast ID management, handling creation, linking, and validation processes for users.
- Built and integrated the Aik Deen content module, providing users with accessible Islamic content and daily engagement features.

Zindagi (JS Bank)

- Worked on Raast Payment and 1LINK payment integrations to enable secure and fast digital transactions.
- Developed Multiple Alias integration for Raast, allowing users to link and manage several payment identifiers easily.
- Built and integrated the Spin and Win module, adding an interactive reward feature to boost user engagement.
- Worked on QR payments, ensuring smooth merchant and user transactions through dynamic and static QR support.

A-Connect (Bank Islami)

- Collaborated with the Java team to integrate their wrappers with our .NET Core backend APIs, enabling smooth open banking connectivity.
- Worked on user registration and merchant onboarding modules on both the ESB platform and our internal system for seamless onboarding flow.
- Developed static and dynamic QR generation features along with their payment handling, ensuring secure and reliable transaction processing within the open banking setup.

PROFESSIONAL EXPERIENCE

DIGI INN

December 2024 - March 2024

- Worked on the Django (MVT) platform to build core ERP features for lab operations and user management.
- Developed custom reports including patient receipts, doctor management modules, and user activity tracking for smoother lab workflows.
- Implemented OCR for CNIC scanning and face recognition for patient verification, improving accuracy and security in the registration process.

TECH VEXA

May 2024 - December 2024

- Developed a complete School Management System including library, student, and teacher management modules for streamlined academic operations.
- Built features for teacher class scheduling, student notes, and attendance portals for both teachers and students.
- Used Dapper and SQL stored procedures to ensure fast and efficient communication between the application and database.

MKJ

December 2023 - May 2024

- Worked on an OLX-style eCommerce platform focused on kids' toys, enabling users to buy and sell products easily.
- Developed and managed third-party vendor modules, including product listings, inventory handling, and order tracking.
- Built core eCommerce features such as user profiles, product management, and secure sale–purchase workflows for a smooth shopping experience.

EDUCATION

ADP (Web Design and Development)

Virtual University

ADDITIONAL INFORMATION

- **Languages:** English, Urdu.
- **Certifications:** .Net Certification (Board Infinity).
- **Awards/Activities:** Python with Calculus Workshop, Chess Compition.
